- > Code ELP : 4E9BMFGI

## Présentation

---

This research seminar series covers topics relevant to the understanding of the origins of the 2008-2010 financial crisis and its international propagation.

The first classes will be dedicated to explaining research sources and methodologies for writing your essays.

*Topics*

1. Role of global banking in the international propagation of crises
2. Foreign banks
3. Home bias and financial protectionism
4. Foreign currency borrowing
5. Financial globalization and risk sharing
6. Financial globalization and development
7. Liberalization and management of capital flows
8. Financial globalization and financial stability

## Objectifs

---

The objective is for students to acquire tools and methodologies to critically read, summarize, and comment on the growing body of literature in the area.
